EDUCATION

VIT Bhopal University

Bachelor of Technology (B.Tech) - Computer Science Engineering

Bhopal, India

2023 – 2027 (Expected)

International Public School

X – 90.2

XII – PCM

Bhopal, India

2020-2021

2022-2023

EXPERIENCE

Prodigy InfoTech

September 2025 – December 2025

Generative AI Engineer Intern

Remote

- Engineered and deployed custom Agentic AI workflows using Python, automating complex problem-solving tasks and enhancing analytical efficiency.
- Designed advanced LLM prompt engineering strategies, optimizing generative AI models to deliver precise, data-driven outputs.
- Collaborated with cross-functional teams to integrate generative AI models into existing analytical pipelines, demonstrating robust problem-solving capabilities.
- Spearheaded the development of scalable AI architectures, translating technical models into practical business intelligence solutions.

PROJECTS

Customer Churn Prediction | Python, SQL, Pandas, NumPy, Scikit-learn

[GitHub](#)

- Developed a comprehensive Machine Learning pipeline to predict customer churn, achieving high classification accuracy utilizing advanced Scikit-learn algorithms.
- Executed robust data preprocessing and feature engineering on complex datasets using Pandas and NumPy to uncover critical predictive variables.
- Conducted rigorous model evaluation applying precision, recall, and F1-scores, ensuring optimal performance of classification algorithms for predictive analytics.
- Translated raw prediction metrics into actionable business insights, enabling data-driven retention strategies and optimizing decision analytics.

Library Management System | ASP.NET Core MVC, C#, Entity Framework Core, SQLite

[GitHub](#)

- Architected a full-stack dashboard utilizing ASP.NET Core MVC and C#, streamlining inventory tracking and user management processes.
- Implemented robust role-based authorization and authentication protocols, ensuring secure access controls across the application ecosystem.
- Engineered efficient CRUD operations integrated with Entity Framework Core, minimizing database query latency and enhancing overall application performance.
- Achieved significant database optimization using SQLite, structuring relational schemas to support rapid data retrieval and reliable information storage.

Blockchain-Based Supply Chain Management | Solidity, Truffle, Ganache, Web3.js, MetaMask

- Programmed and deployed secure smart contracts utilizing Solidity and Truffle, automating decentralized supply chain operations and logistics.
- Engineered a transparent decentralized application (dApp) using Web3.js, establishing immutable and secure product tracking across the blockchain network.
- Leveraged blockchain transparency to mitigate counterfeit risks, ensuring verifiable product authenticity and enhancing overall supply chain integrity.

TECHNICAL SKILLS

Languages: Python, Java, C#, SQL

Frameworks & Libraries: ASP.NET Core MVC, Entity Framework Core, Pandas, NumPy, Scikit-learn

Databases: SQLite, SQL Server

Tools: Git, GitHub, Power BI, Excel, Visual Studio, VS Code

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Machine Learning, Data Analytics

CERTIFICATIONS & ACHIEVEMENTS

- Achievements: TCS CodeVita Season 13 (Global Rank 1450, University Rank 10)
- Certifications: Google IT Support Professional Certificate, NPTEL Marketing Analytics, NPTEL Introduction to Machine Learning, MATLAB Professional, HackerRank Certifications
